SOFT SKILLS

- Willingness to learn
- Critical Thinking
- Teamwork
- Time Management
- Problem Solving

TECH SKILLS

- C#
- Dart
- GDScript
- Html
- CSS
- JavaScript
- Visual Basic
- C++
- Java

FRAMEWORK/ TOOLS

- Netbeans
- Visual studio
- Godot
- Unity
- Flutter
- Arduino

PROFILE

Aspiring Software and game developer with hands-on experience in developing interactive applications using Unity, Godot, and Flutter. Built projects involving simulation systems, mobile applications, and hardware integration, with a strong focus on user experience and functionality.

PROJECTS

Virtual Reality Application for Disaster Preparedness Simulation

- Independently developed a VR game in Unity Engine
- Simulates disaster scenarios such as fire, earthquake, typhoon and flood
- Guides user with interactive instructions and way finding
- Design to train users on proper disaster response

Internship and Placement Tracking System (web-based system)

- Designed for students to help finding internship and job opportunities
- Enabled users to track applications across different companies
- Implement admin functionality for job posting and management
- developed secure user roles (admin, students)

Lucky Gems

- Flutter slot machine game
- Implemented animated reels, win detection, and audio effects

Arduino-based Pen Vending Machine

- Integrated Arduino with Bluetooth and Flutter Mobile App
- Coin and Bluetooth based vending machine
- Controlled vending logics, LCD Display, Sensors, and buzzer

EDUCATION

Bachelor of Science in Information Technology 2022 - 2026
City College of Tagaytay

Senior High School Diploma 2020 - 2022
Sto. Domingo Integrated Highschool
